The follow-up question invited participants to comment on how easy or difficult it was to navigate in ICA-Atom. The greatest challenges to navigation were identified as: small text size and confusing search and sort functionality.
How easy was it to find the appropriate link on the Main Page?

How easy was it to understand the titles on each page?

How easy was it to scan the titles in the text to find the info you wanted?
The follow-up question asked participants to explain why they felt lost when using ICA-AtoM. Five out of 20 respondents identified problems with understanding the labels for digital object upload and the functionality of the browse tabs.
